

LEGO Challenge

Task Cards

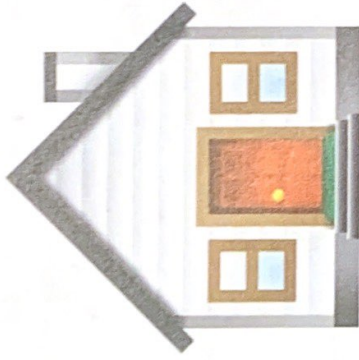

- Great for all ages!
- Designed to appeal to upper elementary students
- Can be utilized with other building materials if LEGOs are not available
- 20 visual task cards with endless possibilities!

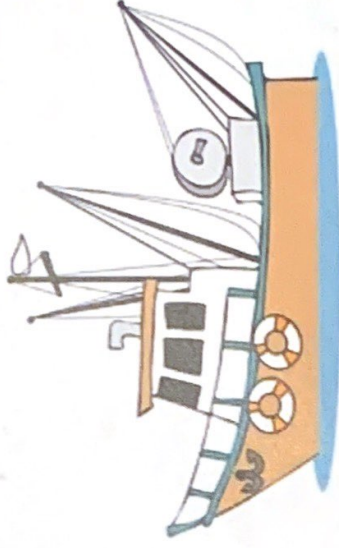

To Use:
I am really excited to show you some cute, older-kid friendly LEGO Challenge Task Cards! These are bright, colorful, and can appeal to older students without looking too primary. Don't have LEGOs? That's okay! These can be used for any building materials you may have—unifix cubes, plastic Flake Discs (Amazon), Bunchems (Amazon or Target), Wiki Stix, pipe cleaners, play-dough, etc. Get those kids engineering and manipulating. They were great as an independent station for special education, a STEM Center, or Brain Break. I recommend printing on cardstock and then laminating for durability. Pull out on a couple cards a week so students never get bored!
